SUMMARY OF QUALIFICATIONS

Versatile and detail-oriented **Software Engineer** with a strong foundation in **Python, SQL, C, HTML/CSS, and Data Science**. Experienced in building **scalable applications, data-driven systems, and embedded projects**. Skilled at collaborating in team environments, solving complex problems, and delivering efficient, production-ready solutions.

EDUCATION

Bachelors in Technology, Electronics and Communication Engineering (Data Science) 2022- 2026
SRM University, Chennai

- Relevant courses: Digital Logic Design, Machine Learning, Database Management System
- CGPA: 9.18/10

RELEVANT WORK EXPERIENCE

National Small Industries Corporation (NSIC)

- **HTML Basics**
 - Structure of a webpage
 - Elements, tags, and attributes
 - Forms, tables, and semantic HTML
- **CSS Fundamentals**
 - Selectors and properties
 - Box model, flexbox, and grid
 - Responsive design techniques

RELEVANT SKILLS

Engineering Skills

- Knowledge of software like MultiSim, Google Colab, VS Code, MySql.
- Gained knowledge on word processors, presentation and spreadsheet tools through certification in Data Science in IBM, Upgrad.

Technical Skills

- Software: Arduino IDE, Multi Simulation
- Programming languages: C, MySQL and Python
- Web development: HTML, CSS

Soft Skills

Analytical thinking, Problem-solving, Communication (English, Tamil, Hindi, Japanese – Intermediate)

APPLIED PROJECTS

Anomaly Detection in IoT Enabled EV Charging Stations **2026**

SRM Institute of Science and Technology, Chennai

- Developed an IoT and Edge AI-based system for real-time anomaly detection in EV charging stations.
- Implemented live monitoring, alert management, CSV analysis, and multi-station monitoring through a Flask-based web application.
- Tools used: Python, Flask, TensorFlow, Scikit-learn, HTML, CSS, JavaScript.

Smart Prosthetic Arm with Haptic Feedback **2025**

SRM Institute of Science and Technology, Chennai

- Developed a Prosthetic arm which gives feedback with help of haptics
- Tools used: Arduino IDE, CAD

GPS Tracker using GSM and LoRa Module **2024**

SRM Institute of Science and Technology, Chennai

- Developed a GPS based wireless communication system using ESP32 to transmit and receive data through LoRa Module.
- Tools used: Arduino IDE, Serial communication, HTML

CERTIFICATIONS

SQL(Intermediate)

Hacker Rank

Python Project for Data Science, Data Base and SQL for Data Science with Python

IBM

Data Visualization with Python, Data Analysis with Python, Tools for Data Science.

IBM

Business Analysis and Project Management

Coursera

Python Libraries: NumPy, Matplotlib and Pandas, Database Design with MySQL

UpGrad

Database Management System

NPTEL

IBM DataScience Professional Certificate

IBM

VOLUNTEERING EXPERIENCE

Working Committee, 2022-2026, IEI Club

Coordinator, 2022-2026, Robotics Club

Member, 2023-Present, Helping Friends Charitable Trust
